PropEV

AUSTRALIA-WIDE

CAPABILITY STATEMENT

Connecting commercial property owners with charging infrastructure

Specialist advice for landlords, REITs, developers, builders and contractors. Partner with a Charge Point Operator, or design and deliver your own EV and truck charging solution.

WHO I WORK WITH

Developers, builders and contractors

New apartments and greenfield projects, where charging is planned in from the start.

Property owners, landlords and REITs

Adding charging to existing assets, and dealing with Charge Point Operators.

Public and private EV charging. Public and private truck charging.

SERVICES

01 Electric vehicle strategy

A charging plan for your site or portfolio: what to install, for whom, and when.

02 Charging provider procurement

Shortlisting and selecting the right provider for your site.

03 Licence and lease negotiation

Negotiating the terms with the operator on your behalf.

04 Financial feasibility

Costs, revenue and returns assessed before you commit.

05 Design and development

Design, approvals and grid connection through to commissioning.

06 Contractor procurement

Selecting contractors and managing them through construction.
